[^0]
[^0]:    The neqative euribor is resulting in a negative amount of senior interst on the $A$-note, the $B$-note and the $C$-note. As the transaction documentation is not explicitly stating anything related to this situation, it is currently decided to
    floor this interest part at zero and to present this in the distribution report.
    tiortit tisin interest part at zero and to present this in the distribution report. Unt ledger will be maintained. As long as senior interest is floored, it will automatically be included in the subordinated interest part,
