Target amortisation events

On the target amortization date and any quarterly payment day thereafter the notes will redeem in a different way (using the notes redemption available amount) unless any target amortization event has occurred and is not cured.

- 1) Reserve account level: The balance on the reserve account may not be less than the reserve account target level
- 2) The delinquent quotient (the sum of the principle amount outstanding of the mortgage receivables that are more than 60 days in arrear divided by the aggregate principle amount outstanding of the mortgage receivables) may not be above 1.5%
- 3) Any drawing under the liquidity facility is not repaid, or a drawing is made on the quarterly payment date
- 4) There may not be any balance on the principle deficiency ledger

Reserve account level	-	Not Broken/Cured	
Delinquent quotient	1.20%	Not Broken/Cured	Not broken/Cured
Liquidity facility drawn	-	Not Broken/Cured	
PdL balance	-	Not Broken/Cured

The negative euribor is resulting in a negative amount of senior interest on the A-note and B-Note. As the transaction documentation is not explicitly stating anything related to this situation, it is currently decided to floor this interest part at zero and to present this in the distribution report. Until final assessment is done on how to process negative interest amounts a ledger will be maintained. As long as senior interest is floored, it will automatically be included in the subordinated interest part, which is made visible in the above table.
