Reserve account target level triggers		
If on the immediately succeeding quarterly payment date the rated notes will be redeemed in full, the target will be zero, else up to the Quarterly payment date in October 2009, 0.50% of the aggregate principle amount outstanding on the rated notes on issue date, thereafter the higher of 0.20% of the aggregate principle amount outstanding on the rated notes on issue date and 0.40% of the aggregate principle amount outstanding on the rated notes on the first day of the immediately succeeding Floating Rate Interest Period.		
Delinquent mortgage receivables are the principle amounts outstanding of those loans who are 90 days or more in arrears, or less than 90 days in arrear, but given to the civil-law notary to start foreclosure-procedures. When this amount exceeds 2% of the aggregate principle amount outstanding on the mortgage receivables, the calculation of the target level of the reserve account will change to 1.35% of the aggregate outstanding principle amount of the rated notes at closing date
