HISTORICAL DATA OF PRIOR SECURITISED MORTGAGE POOLS

The following tables set forth certain historical data of the mortgage pools of the 11 non-NHG previous securitisations by issuers E-MAC NL 2002-I B.V. through E-MAC Program B.V. Compartment NL 2007-III, of mortgage loans originated or acquired by the Sellers and securitised between 2002 and 2007. The tables show aggregate delinquency experience and cumulative loss experience for the mortgage pools as at 31 December 2003, 2004, 2005, 2006 and 2007. See "*Arrears and Default Procedures*" in the Base Prospectus. The data has been extracted from the investor reports with respect to these mortgage pools, which are available on the Internet at www.emacinvestors.com.

A mortgage loan is shown as "31-60 days" delinquent when a payment due on any due date remains unpaid as of the close of business on the next following monthly due date. However, since the determination as to whether a loan falls into this category is made as of the close of business on the last business day of each month, a loan with a payment due on 1 November that remained unpaid as of the close of business on November 30 would still be considered current as of 30 November. If that payment remained unpaid as of the close of business on December 31, the loan would then be considered to be 61-90 days delinquent.

The mortgage loans described in these tables consist of "Prime" mortgage loans that were originated in accordance with the lending criteria of the relevant originator at the time of offer of the mortgage loans and were sold by the Sellers subject to the warranties relevant to each securitisation. The Sellers are obliged to repurchase mortgage loans that are in breach of these warranties. The mortgage loans included in the aggregate portfolio as of any given date do not include mortgage loans that are repurchased or redeemed prior to such date, but may include further advances made and substitute mortgage loans sold prior to such date. The data includes mortgage loans from mortgage pools up to the date that the notes in respect of those mortgage pools have been fully redeemed, after which those mortgage pools are excluded from the data. The historical data presented in these tables should not be taken to be indicative of the future performance of Pool NL 2008-I.

Losses are recorded when a property securing a mortgage loans is sold and the net sale price after costs is less than the amount outstanding on the mortgage loan. This loss may subsequently be reduced following action to recover any shortfall.

PART D - SUMMARY OF POOL NL 2008-I

The Mortgage Receivables to be sold and assigned to the Issuer on the Issue Date represent the rights (whether actual or contingent) of the Initial Sellers against any Borrower under or in connection with the Mortgage Loans selected by agreement between the Initial Sellers and the Issuer.

The numerical information set out below relates to a portfolio of Mortgage Loans (the '**Provisional Portfolio**') which was selected as of the close of business on 1 January 2008 (the '**Portfolio Cut-Off Date**'). All amounts are in euro. All amounts relating to principal are exclusive of the Participations, unless stated otherwise. The information set out below relates to the Provisional Portfolio and may not necessarily correspond to that of the Mortgage Receivables which will be selected from the Provisional Portfolio and actually sold to the Issuer on the Issue Date. After the Issue Date, the portfolio will change from time to time as a result of repayment, prepayment, amendment and repurchase of Mortgage Receivables and the purchase of New Mortgage Receivables.

PART E - EXPECTED AMORTISATION PROFILE OF THE NOTES BASED ON ASSUMPTIONS

This profile takes into account the purchase of New Mortgage Receivables during the Pre-funding Period with the following characteristics:

The estimated average life (on an actual/360 basis) of the Notes and the following decremental tables from the Issue Date up to the First Put Date based on the assumptions that (a) the Issue Date is 31 January 2008; (b) there will be a CPR of 10 per cent; (c) the interest rate applicable to a Mortgage Loan will not change on an interest reset date; (d) the Mortgage Receivables will not be prepaid on an interest reset date (other than what is effected by the assumed CPR); (e) no delinquencies and no defaults in respect of the Mortgage Receivables will occur; (f) there will be no Further Advances and no repurchases of the Mortgage Receivables by any of the Sellers; and (g) the New Mortgage Receivables to be purchased during the Pre-funding Period will meet the assumptions set forth below, will be as follows:

- (i) the Senior Class A1 Notes 1.31 years;
- (ii) the Senior Class A2 Notes 3.17 years;
- (iii) the Mezzanine Class B Notes 3.18 years;
- (iv) the Junior Class C Notes 3.18 years; and
- (v) the Subordinated Class D Notes 3.18 years.

The numerical information set out below has been calculated using the data available at the Portfolio Cut-Off Date. The Mortgage Loans have been grouped by repayment type, remaining interest reset term and fixed/floating interest rate. For the purposes of the remaining interest term, all floating rate Mortgage Loans have been grouped together, for all other purposes all Mortgage Loans have been grouped at five year intervals. For the purposes of the repayment type, all Interest-only, Life, Star, Switch, Investments and universal life Mortgage Loans have been grouped as Interest-only Mortgage Loans, and all Annuity, Linear and Savings Mortgage Loans have been grouped as Annuity Mortgage Loans and all Bridge Loans have been grouped together. The weighted average has then been taken for interest rate, months to reset and remaining term. The New Mortgage Receivables have been assumed to have the same characteristics as the initial pool and have been purchased by the Issuer at the Issue Date.
