PART E - EXPECTED AMORTISATION PROFILE OF THE NOTES BASED ON ASSUMPTIONS

This profile takes into account the purchase of New Mortgage Receivables during the Pre-funding Period with the following characteristics:

The estimated average life (on an actual/360 basis) of the Notes and the following decremental tables from the Issue Date up to the relevant First Put Date in respect of the Put Option Notes based on the assumptions that (a) the Issue Date is 14 April 2008; (b) there will be a CPR of 10 per cent; (c) the interest rate applicable to a Mortgage Loan will not change on an interest reset date; (d) the Mortgage Receivables will not be prepaid on an interest reset date (other than what is effected by the assumed CPR); (e) no delinquencies and no defaults in respect of the Mortgage Receivables will occur; (f) there will be no Further Advances and no repurchases of the Mortgage Receivables by any of the Sellers; and (g) the New Mortgage Receivables to be purchased during the Pre-funding Period will meet the assumptions set forth below, will be as follows:

- (i) the Senior Class A1 Notes 0.50 years;
- (ii) the Senior Class A2 Notes 3.83 years;
- (iii) the Mezzanine Class B Notes 4.60 years;
- (iv) the Junior Class C Notes 4.60 years; and
- (v) the Subordinated Class D Notes 4.60 years.

The numerical information set out below has been calculated using the data available at the Portfolio Cut-Off Date. The Mortgage Loans have been grouped by repayment type, remaining interest reset term and fixed/floating interest rate. For the purposes of the remaining interest term, all floating rate Mortgage Loans have been grouped together, for all other purposes all Mortgage Loans have been grouped at five year intervals. For the purposes of the repayment type, all Interest-only, Life, Star, Switch, Investments and universal life Mortgage Loans have been grouped as Interest-only Mortgage Loans, and all Annuity, Linear and Savings Mortgage Loans have been grouped as Annuity Mortgage Loans and all Bridge Loans have been grouped together. The weighted average has then been taken for interest rate, months to reset and remaining term. The New Mortgage Receivables have been assumed to have the same characteristics as the initial pool and have been purchased by the Issuer at the Issue Date.
